

Reflex Manufacturing ERP Overview

What is Enterprise Resource Planning software and why do I need it?

A modern solution—one that offers real-time data management, full and extensive integration throughout all of its programs, embedded analytics, and mobile access—can significantly improve a company's efficiency and productivity, helping taking business growth to the next level.

When you choose the Reflex ERP, you're choosing a next generation system—a personalized software solution that caters directly to the manufacturing industry.

More than anything, we believe that delivering the right ERP solution is the key to each company's success.

Tailored to the manufacturing sector, Reflex is an easy to use but powerful software system that offers a comprehensive real-time view of an organization while also standardizing operations and workflows.

Reflex Manufacturing helps manufacturing companies plan for the future and increase productivity, delivering full management of the shop floor.

Manage work orders, maintain compliance with continual quality standards, and synchronize all moving parts to keep your organization ahead of the competition.

One solution is all you need

Increase Productivity

Improve productivity with real-time updates and full production floor management

Make informed decisions

Improve decision-making abilities with optimized information exchange capabilities

Lean Manufacturing

Build a more efficient and effective sustainable organization with electronic document management, web portals, reduced resources, and more

Expand your revenue stream

Increase bottom-line profits and expand your revenue stream with improved workforce management

Ensure success

Effectively manage in-progress work orders, volume capacity, raw materials, equipment, and overall business functions

Meet your customers' changing demands with the ability to fully manage all incoming orders and resources

"We are very happy with the partnership with Reflex and would not hesitate to recommend their products and services."

- Gerald Telidetzki, Chief Financial Officer, Steel-Craft Door Products Inc.

- Terry Rolph, Chief
Financial Officer,
Lenmak Exterior
Innovations Inc.

"There are a lot of different factors to consider when determining which material to use to get the finished product. Before Reflex ERP, all of those decisions [were] done on the shop floor. Now a lot of those decisions are made in the front office where we can actually see which machines are busy and which are not. The Reflex solution is designed to fit the way our business works while offering extensive personalization without the need for custom development."

Manufacturing Features

Inventory Management

- Inventory Movement
- Maintenance
- RMAs
- Count Process Assistant
- Stock Replenishment

Build to Order

- Raw Materials
- Sub-assemblies
- Attributes/Components
- Labor Standards/Actuals

- Buy-in directly to Work Orders
- Linked PO Allocations
- Centralized Services

Embedded Business Intelligence and Analytics

Reporting

Embedded analytics and reporting means that users can generate personalized reports to showcase relevant business data—anytime, anywhere.

Benefits of Reflex

Fully integrated data in a single authoritative data repository ensures that critical business information is consistent, controlled, accurate, and accessible.

Likewise, Reflex's template-based design means that all screens and functions have the same look and feel for end-users. Security and audit are configured in one place, and apply comprehensively and consistently across all modules and functions.

Common features such as reporting and analytics, workflow, and document management are embedded into the design of all Reflex modules. These functions appear naturally and consistently within menus, screens and processes across the entire Reflex solution.

Experience the next generation of ERP with Reflex's mobile functionality, web portal access, intelligent alerts, and embedded analytics.

"As a company we have always used our software to a competitive advantage, and in today's marketplace, that is more important than ever. Our sales team can now leverage this information to build even stronger relationships with their customers. Plus, when you look at what we can now do through the Dealer self-service web portals, we can attest to the Reflex value proposition: 'Turn the data you have into the information you need.' It is truly amazing."

- Tom Moore, Vice President and General Manager, Factor Forms and Labels
