

Reflex

LAND DEVELOPMENT

Turn your land into communities with the Reflex ERP.

Our Land Development software manages the process from beginning to end, from raw land acquisition to lot payouts.

Control and organize raw land holdings in one complete system, determine how much land needs to be developed, estimate future stages, track budget, and more—all with Reflex.

Every cost can be viewed in a grid or chart. With Reflex Land Development, users never have to run reports to access project information (although the software still boasts hundreds of on-demand reports).

“ Reflex has allowed us to reduce our reliance on manual spreadsheets for reporting. We have also been able to stop using multiple software programs to handle our day to day operations as Reflex can handle it all.

*Jeremy Meinema, Finance and Sales Manager,
City of Saskatoon – Saskatoon Land*
