

Reflex

MANUFACTURING AND DISTRIBUTION

Stay ahead of the competition with a postmodern ERP system that's tailored specifically to the manufacturing and distribution industries.

Reflex ERP software is an easy to use but powerful solution with multiple modes of operation. Manage all aspects of your business, from finances to the shop floor, while also staying on top of orders, managing inventory, and more.

With Reflex, you can fully manage work orders, maintain compliance with continual quality standards, and synchronize all moving parts throughout the organization – all in real time.

Manage a warehouse with advanced functionality to improve business operations, employee productivity, and overall profit.

Plan for the future with a postmodern, state-of-the-art ERP solution that standardizes operations and workflows across an organization and offers a 360-view with built-in custom reporting. Manage the cost of inventory and support the efficient and effective distribution of goods with one single software solution.

Manage every aspect of your organization with our manufacturing and distribution-specific modules:

Custom Manufacturing
Project Costing
Estimating and Quotations

Inventory and Warehouse Management
Build for Order / Build for Stock
Order Management

Quote Management
RFID Ready
Barcode Enabled Billings

Scheduling and Production Management
Installation Orders
Purchase Order Requisition

Web Portals
Analytics, Business Intelligence,
and Reporting
