

REFLEX
erp

With the Reflex ERP, you can manage all aspects of your business with one single, fully integrated software solution.

With real-time updates and embedded features such as analytics, reporting, and document management, Reflex keeps everyone in your company connected at all times.

Why use multiple software systems when you can use just one?

Q

Business software specifically for your industry

CONSTRUCTION

**LAND
DEVELOPMENT**

**PROPERTY
MANAGEMENT**

Reflex ERP is a next generation system that leverages the latest technology to deliver highly functional, adaptive software that can run on virtually any device and can be hosted either on-site or in the cloud. A personalized software solution, Reflex ERP caters directly to your line of business.

Make the move towards sustainability and Lean Enterprise with a fully integrated software solution that offers electronic document management, web portals, reduced resources, and more.

**Reflex ERP Software can be used in a
number of industries, including:**

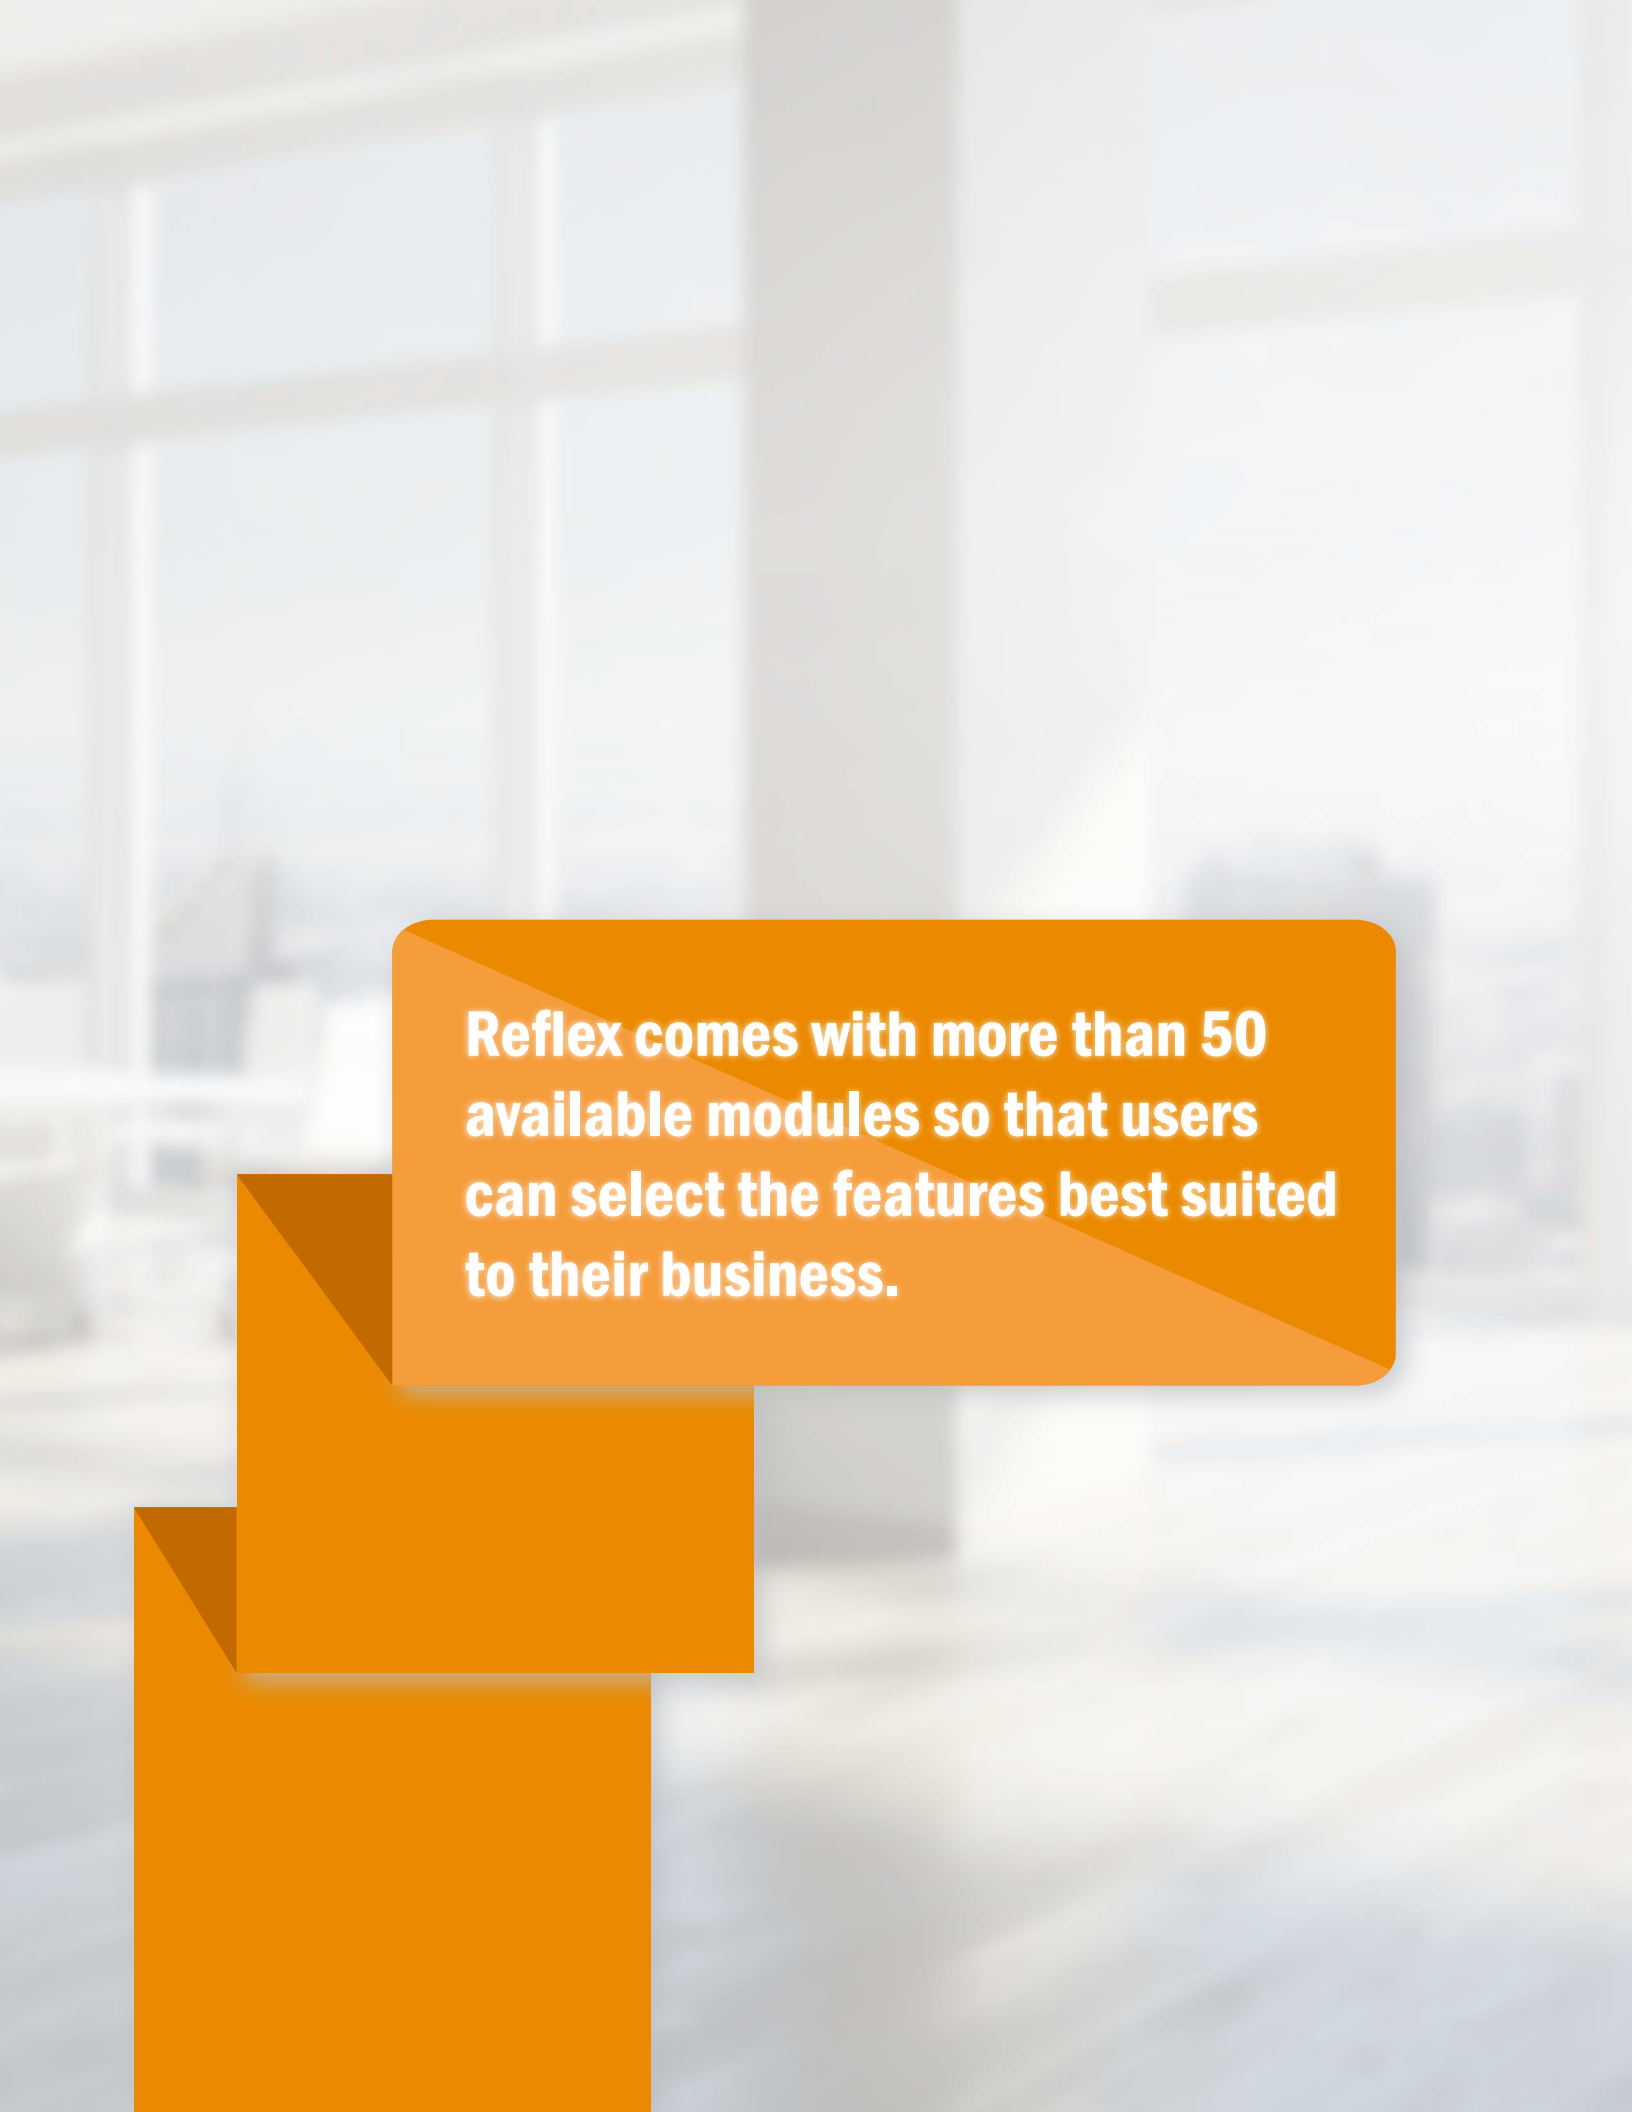

MANUFACTURING

DISTRIBUTION

**PUBLIC
SECTOR**

Reflex comes with more than 50 available modules so that users can select the features best suited to their business.

Modules include:

Want a new ERP but aren't sure how to host it?

Q

On-site Hosting

Install the software directly on your server infrastructure and manage it from in-house. This is best for companies that have already invested in network infrastructure and want to have their data on-site.

Cloud Hosting

Host the software in the cloud and reduce the upfront cost of infrastructure. This is a flexible option that offers high performance without the cost of in-house equipment, and works best for companies with a strong enterprise-wide internet connection.

Reflex offers competitive pricing options that vary depending on client requirements and organization size.

Clients can choose a one-time payment option (Perpetual License) for full licensing of the software. This is then followed by a yearly support and service fee for ongoing upgrades and customer support.

1

We also offer a yearly subscription for clients who want to spread the cost out over several years. This is a lower upfront cost for full use of the Reflex ERP Software.

Employee Portal

Reflex's Employee Portal allows your staff to review work schedules, request vacation time, view all historical payments and deductions, and many other functions. Various web portals are available depending on your business requirements.

Take a closer look.

Financial

Slice and dice all commitments and actuals through the easy-to-use analytics tool and present data in any format with Reflex.

Analytics

Design your own graphs. Export data to external sources. Browse hundreds of report templates or create your own. With Reflex Analytics™, generating reports or ad-hoc queries is as easy as clicking a button.

**“We are very happy with the partnership
with Reflex and would not hesitate to
recommend their products and services
to other companies.”**
