

What makes Reflex ERP software **DIFFERENT**?

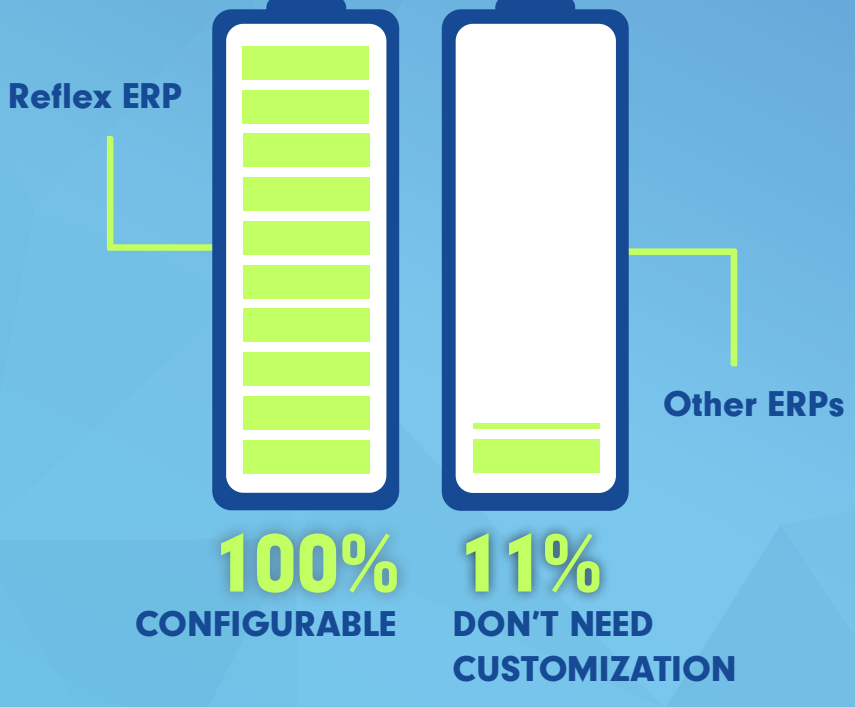

Choosing a software system to help run your business can be a big decision. We stand by our ERP software as one of the most comprehensive packages in the industry.

Here's what makes us stand out from the rest.

100% CONNECTED

FULL INTEGRATION

Reflex is a fully integrated solution, which means that 100% of the software's modules are connected in real time.

CONFIGURATION VS. CUSTOMIZATION

100% of Reflex software is configurable without the need for customization. Only 11% of popular ERP systems don't require any customization.

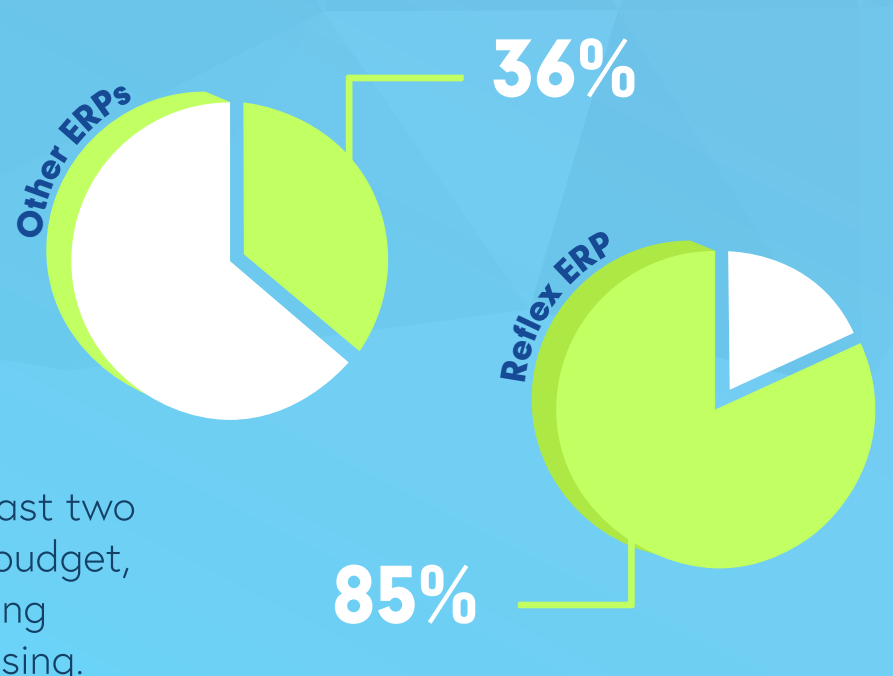

COST

The average cost of Reflex ERP projects is a fraction of the cost of other brand name ERP projects.

WITHIN BUDGET

36% of ERP projects in 2017 stayed within budget. 85% of Reflex projects in the last two years were completed within budget, with the remaining 15% requiring extended implementation phasing.

IMPLEMENTATION TIMES

2017 Industry average: 17.4 months
Reflex average: 6 months
